Report

Tree-planting is the process of transplanting tree seedlings, generally for forestry, land reclamation, or landscaping purpose. It differs from the transplantation of larger trees in arboriculture, and from the lower cost but slower and less reliable distribution of tree seeds. Trees contribute to their environment over long periods of time by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil, and supporting wildlife. During the process of photosynthesis, trees take in carbon dioxide and produce the oxygen we breathe. The National Service Scheme (NSS) Unit of Institute of Shrishankarprasad Agnihotri college of Engineering, Wardha organized “Tree Plantation” program on 15th Aug.2018 in the college premises. It was attended by Dr. R. Tugnayat, Principal; Prof. S. Narse, NSS Program Coordinator; and student volunteers planted the saplings.

Report

Every man need the oxygen for their life and Trees are the foremost source of oxygen as well trees helps to reduce the level of CO₂. As we all know that the whole world is facing the problem of global warming and to recover from such problem planting the trees has become one of the most important today's aspects. The National Service Scheme (NSS) Unit of ShriShankarprasadAgnihotri college of Engineering, Wardhaorganized "Tree Plantation" program on29th July 2019 in the college premises. It was attended by Dr. R. Tugnayat, Principal; Prof. S.Narse, NSS program Coordinator; and student volunteers. Under the Guidance of Asst.; Prof. S.Narse, NSS Program Coordinator, NSS volunteers planted the saplings. The students also placed bricks as barricades and each student took the responsibility to nourish and maintain the allocated plant. Eventually, the ground attained a glorious look. The committee decided to proceed with the same inspiration, enthusiasm and zeal to enhance the beauty of the college campus.

Report

As if the logistical challenges of planting millions of trees were not enough, add into the mix a global public health crisis, unlike anything the world has seen in generations. The Corona virus pandemic (COVID-19) has taken an immense toll on the lives and well-being of many and created unprecedented challenges to on-the-ground forestry and conservation efforts. The National Service Scheme (NSS) Unit of ShriShankarprasadAgnihotri college of Engineering, Wardha organized “Tree Plantation” program on 16th July 2020 in the college premises. It was attended by Dr. R. Tugnayat, Principal; Prof. S.Narse, NSS program Coordinator; and student volunteers. Report

Trees beautify our surroundings, produce oxygen, absorb pollutants, sequester greenhouse gases, regulate temperature and prevent soil erosion, besides acting as wind barriers. They are grown for their aesthetic value in landscapes and or economic importance. The Indian tree flora diversity ranks 10th in the world and comprises of nearly 2000 species belonging to about 800 genera and 150 families of flowering plants, which includes majority of the cultivated and exotic species. With the increase in population, rapid expansion of area under food and commercial crops, deforestation, extension of urban area, establishment of industries in rural areas and other factors, there is considerable depletion of genetic wealth, many of them being in the verge of extinction... The National Service Scheme (NSS) Unit of ShriShankarprasadAgnihotri college of Engineering, Wardha organized "Tree Plantation" program on 25th July 2022 in the college premises. It was attended by Dr. R. Tugnayat, Principal; Prof. S.Narse, NSS program Coordinator; and student volunteers. Under the Guidance of Prof. S.Narse NSS Program Coordinator, NSS volunteers planted the saplings.
